

# EXT\_INT

## 1. Operation Outline

The port input by SW triggers the generation of the external interrupt.  
The LED lights when the external interrupt is generated.

## 2. Each Setting

SW : SW0 (Port12)

LED : LED0 (Port25)

External interrupt : INT0 (Port12)

## 3. Basic Operation

When SW0 is pushed down, LED0 lights.

## 4. Note

None.
