

# PORT

## 1. Operation Outline

External interrupts (INT05a, INT11b) are generated using the port input by the switch as a trigger.  
The LED light on / off every time an external interrupt occurs.

## 2. Each Setting

<u>SW</u>		: SW5 (PortE5)
<u>LED</u>	INT05a	: LED0 (PortJ0)
	INT11b	: LED1 (PortJ1)
<u>External interrupt</u>		: INT05a (PortE5)
		: INT11b (PortE5)

## 3. Basic Operation

Each time SW5 is operated, the LED is switched light on / off.

## 4. Note

Multiple push-downs of the switch are not supported.
