A_ENC32

1. Operation Outline

The rotation of the rotary encoder is detected in the encoder mode. The blink interval of the LED depends on the count.

2. Each Setting

LED   : LED0 (PortJ0)
                      : LED1 (PortJ1)

Rotary encoder   : ENC1A (PortR3)
                      : ENC1B (PortR4)

3. Basic Operation

When the rotary encoder is rotating clockwise, the LED0 blinks and the LED1 lights out. The blink interval depends on the count.
When the rotary encoder is rotating counterclockwise, the LED1 blinks and the LED0 lights out. The blink interval depends
 on the count.

4. Note

Nothing.
