### **CEO Commitment**

We are channeling the powers of Toshiba's 200,000 employees into solutions to global issues.

Hisao Tanaka Director, President and CEO

### Promoting CSR Management to Sustain a Safe, Secure and Comfortable Society

Our world today faces diverse social issues attendant with population growth, aging societies, fast growing demand for energy and shortages of natural resources, and global environmental problems. Toshiba Group is determined to actively contribute to solutions to these problems, and to support realization of the safe, secure and comfortable society of the Human Smart Community. Towards this end, Toshiba Group itself must achieve steady and sustainable growth.

In order to realize Toshiba Group's unique strategy for Growth through Creativity and Innovation, we will lay down solid foundations to promote CSR management, strong enough to support management policies that enhance business through value creation and productivity improvement. With this in mind, I will promote policies that develop diverse, talented, and creative global human resources.

Toshiba's Vision

Toshiba Group Management Policy Vision

### Meeting the Expectations of Our Many Stakeholders

To push forward with CSR management, my primary concerns as President and CEO are to bring together the concerted abilities of Toshiba Group's 200,000 employees, and to ensure that we place the highest priority on human life, safety and compliance. This will support us collaborating with all of our stakeholders and contributing to the achievement of a sustainable society through our business activities. Recently, we have worked with independent third parties to review issues and strategies to focus on in future, and we have identified human rights, supply chain CSR management and environmental issues as CSR-related issues crucial to our further globalization.

We believe that, as a global company, we are obliged to reinforce CSR initiatives in respect of human rights, labor, occupational health and safety, the environment and ethics. This concern covers not only group companies but extends to the suppliers in our worldwide supply chain. Acting on this conviction, we joined the Electronic Industry Citizenship Coalition (EICC)\*1, an electronic industry CSR promotion organization, in June 2011, and are promoting CSR management in line with the objectives of EICC's code of conduct. We recognize the conflict minerals originating in the Democratic Republic of the Congo and adjoining countries as a serious human rights issue. We have responded with Groupwide policies to require the use of conflict free minerals, and are requesting our suppliers to cooperate and provide sourcing information.

In support of climate change mitigation and tackling other environmental problems, we are implementing measures based on the long-term goals defined in the Environmental Vision 2050, and on near-term targets defined in our Environmental Action Plan. In the high-priority areas for the four Green Initiatives\*2, we have set FY2015 goals at higher levels than our competitors. In FY2013, we released T-COMPASS\*3 a powerful concept for further developing and expanding our environmental management. This visibly represents important and urgent worldwide environmental issues—minimization of natural resource consumption (Natural resources); mitigation of climate change (Energy); reduction of chemical substance risk (Substance); and minimization of water consumption (Water)—as the four cardinal compass points, N, E, S and W. T-COMPASS is supporting our concerted Group-wide efforts to identify key problems and find solutions.

Through FY2013, we have continued to support the restoration of Northeast Japan from the devastating effects of the major earthquake and tsunami that stuck the region on March 11, 2011. We will continue these efforts by focusing on three core themes: human resource development, recovery of local industries, and rebuilding communities. At the same time, we continue to cooperate in the stabilization and decommissioning of the Fukushima Daiichi Nuclear Power Plant.

- \*3: Toshiba Comprehensive environmental database and its Practical Application to Simplified and/or Streamlined LCA

### CSR Management Supported by 200,000 Employees

I believe it is important for each and every one of Toshiba Group's 200,000 employees to fully understand the need for compliance, to contribute to the local community, and to carry out their responsibilities with a keen sensitivity to the expectations of our stakeholders. In 2004, Toshiba Group signed the United Nations Global Compact, which defines basic principles regarding human rights, labor, the environment and anticorruption. To bring the spirit of the Compact into our daily business activities, we established the Toshiba Group Standards of Conduct, which define the values and code of conduct that must be observed by all Toshiba Group executives and employees.

As part of our efforts to encourage and promote corporate citizenship activities at all group companies, we created a corporate citizenship awards program, the Toshiba "ASHITA" Awards, in 2005. In FY2013, we received 1,616 nominations for the awards. In FY2013, in addition to the existing corporate citizenship award, we created a new award for contributions to solving social problems through business.

We are also working to raise the environmental consciousness of individual employees. For example, on June 5, World Environment Day, we held Toshiba Group Global Environmental Action events, in which Toshiba Group employees in countries around the world conducted environmental activities in unison.

I will continue to take the lead in concentrating the energy of the 200,000-plus people working for Toshiba Group around the world, to make it a group of companies that provides new value to customers and contributes to society on an ongoing basis, and in which each company works vigorously to achieve significant results. As I do so, I would greatly appreciate your continued support and cooperation.

### **Corporate Philosophy**

### Basic Commitment of the Toshiba Group

Toshiba Group's Corporate Philosophy emphasizes respect for people, creation of new value, and contribution to society. The Group slogan – "Committed to People, Committed to the Future. TOSHIBA." – expresses the essence of our corporate philosophy. We recognize that it is our corporate social responsibility (CSR) to put our philosophy and slogan into practice in our day-to-day business activities. In doing so, we accord the highest priority to human life and safety and to compliance.

### **Basic Commitment of the Toshiba Group**

We, Toshiba Group companies, based on our total commitment to people and to the future, are determined to help create a higher quality of life for all people, and to do our part to help ensure that progress continues within the world community.

### 1. Commitment to People

We endeavor to serve the needs of all people, especially our customers, shareholders, and employees, by implementing forward-looking corporate strategies while carrying out responsible and responsive business activities. As good corporate citizens, we actively contribute to further the goals of society.

### 2. Commitment to the Future

By continually developing innovative technologies centering on the fields of Electronics and Energy, we strive to create products and services that enhance human life, and which lead to a thriving, healthy society. We constantly seek new approaches that help realize the goals of the world community, including ways to improve the global environment.

Toshiba Group Slogan Committed to People, Committed to the Future. **TOSHIBA** 

\*UN Global Compact: A voluntary corporate citizenship initiative concerning human rights, labor, the environment, and anti-corruption proposed by the former UN Secretary-General Kofi Annan in 1999 at the World Economic Forum. Toshiba joined the UN Global Compact in 2004

### Toshiba Group's CSR Management

CSR Management to support "Growth through Creativity"

CSR activities supported by 200,000 Toshiba Group employees

CSR management means giving top priority to human life, safety, and legal compliance and contributing to the solution of problems in the global society through business.

In order to meet the expectations of stakeholders, it is our responsibility to communicate with various stakeholders in promoting CSR activities. Such activities must be supported by each and every one of Toshiba Group's 200,000 employees worldwide.

### Participation in External CSR Organizations

### Active Participation in and Cooperation with External CSR Organizations

Toshiba Group promotes participation and collaboration with external CSR organizations, industry associations, government, international organizations and NGOs.

### Membership in CSR-related organization

- UN Global Compact
- Electronic Industry Citizenship Coalition (EICC)
- World Business Council for Sustainable Development (WBCSD)
- World Economic Forum (WEF)
- Science and Technology in Society Forum (STS Forum)
- Busibess for Social Resiponsibility (BSR)
- Council for Better Corporate Citizenship (CBCC)

### UN Global Compact

In January 2004 Toshiba joined the United Nations Global Compact, pledging to adhere to universal principles covering human rights, labor and the environment. The Global Compact is a voluntary corporate citizenship initiative proposed by UN Secretary-General Kofi Annan in 1999 at the World Economic Forum (annual meeting in Davos). The Global Compact envisages that in the course of business, companies' fulfillment of their corporate social responsibilities through compliance with internationally recognized principles concerning human rights, labor, the environment and anti-corruption will lead to the emergence of a sustainable global economy.

As a participant of the United Nations Global Compact, in 2007, Toshiba participated as an advisory to the project utilizing GRI guidelines for "Communication on Progress (COP)", a report of the progress on the implementation of Global Compact principles.

Toshiba clarifies the implementation progress of the ten principles of the Global Compact by submitting a COP advanced level report once per year.

#### 10 Principles of the UN Global Compact

#### **Human Rights**

- 1. Businesses should support and respect the protection of internationally proclaimed human rights; and
- 2. make sure that they are not complicit in human rights abuses.

#### Labor Standards

- 3. Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;
- 4. the elimination of all forms of forced and compulsory labor;
- 5. the effective abolition of child labor; and
- 6. the elimination of discrimination in respect of employment and occupation.

#### Environment

- 7. Businesses should support a precautionary approach to environmental challenges;
- 8. undertake initiatives to promote greater environmental responsibility; and
- 9. encourage the development and diffusion of environmentally friendly technologies

#### Anti-Corruption

10. Businesses should work against all forms of corruption, including extortion and bribery.

> The Ten Principles

### EICC Membership

The Electronic Industry Citizenship Coalition (EICC) is the electronics industry's CSR promotion organization committed to fulfill CSR for labor, occupational health and safety, the environment, and ethical standards throughout the supply chain. It is founded in October, 2004, and as of June 2014 95 companies all over the world have joined. Toshiba Joined in June 2011 to promote supply chain CSR based on global standard.

### World Business Council for Sustainable Development (WBCSD)

The World Business Council for Sustainable Development (WBCSD), led by the CEOs of about 200 global corporations, aims to realize a sustainable future for business, society, and the environment. WBCSD provides constructive business solutions to realize sustainable societies by displaying leadership, offering effective opinions, and taking concerted action. Toshiba is a member of WBCSD, and Atsutoshi Nishida,

Toshiba's Chairman, has served as a member of the WBCSD Executive Committee since 2010 and as one of its Vice Chairmen since 2012. As a core member of the Energy & Climate focus area group and a member of the ISO Smart Community Infrastructure Work Stream, Toshiba aims to act globally to contribute to the realization of sustainable societies.

> WBCSD

### Participation in the World Economic Forum

The World Economic Forum (WEF) brings together corporate CEOs, political leaders, scholars, journalists, and others who take global leadership roles to discuss important issues facing the world such as those related to the environment, energy, and health. Toshiba is a WEF strategic partner, and at the 2013 annual meeting in Davos, we participated in the Infrastructure & Urban Development Community Initiative, which discusses how to achieve sustainable infrastructure and economic development. We also actively participate in regional meetings held in various places throughout the world in order to contribute to solving problems unique to the regions concerned.

> World Economic Forum

### Participation in the STS Forum

The Science and Technology in Society (STS) forum, which aims to ensure appropriate development of science and technology, gathers scientists, policymakers, business leaders, journalists, and others in one place to discuss and exchange opinions about issues related to science and technology as well as society from the perspective that these are issues shared by humanity. Toshiba has participated in the STS Forum since 2004. In addition, as a Council member, Chairman Atsutoshi Nishida is actively involved in guiding the direction of the Forum's activities.

> STS Forum

### Participation in BSR

Business for Social Responsibility (BSR) is a global nonprofit organization for CSR activities which is established in the U.S. in 1992. 250 or more global organizations and companies had participated as a member, and Toshiba joined in 2003. We engaged in stakeholder dialogues facilitated by BSR, and participated in Study Forums on human rights and supply chain CSR.

### Participation in CBCC

Council for Better Corporate Citizenship (CBCC) is an association, established in 1989 by Keidanren (Federation of Economic Organizations), which supports Japanese company to be accepted by regional communities as "Good corporate citizen" as well as promotes CSR activities in practice. Toshiba joined CBCC from its establishment, and currently takes part in activity as a member of planning committee.

> CBCC

### **History of CSR Activities**

| Concerned | with environmental issues   |
|-----------|---|
|           | Organized "Business & Human Rights Workshop" for human resource managers from 9 Asian countries.  |
| FY2013    | Newly established "Social Contributions by Business" category to Social Contribution Award.   |
|           | Introducing T-Compass, a new concept of environmental management.   |
|           | Continued implementation of the PDCA cycle according to ISO 26000.  |
|           | Surveys of some 10,000 suppliers regarding their approaches to issues related to conflict minerals and CSR promotion.   |
| FY2012    | Achievement of 0.67 trillion yen in sales of excellent ECPs (Environmentally Conscious Products with the industry's highest level of environmental performance in terms of KPIs). |
|           | Donation of LED lighting to the Golden Hall of Chusonji Temple: this lighting improvement project with the temple won the Japan Lighting Award.                                   |
|           | Implementation of PDCA cycle of checking, identification of issues, planning, action, and evaluation based on ISO 26000.  |
|           | Established Toshiba Group Conflict Mineral Policy.  |

CSR Highlight 2014

## Materialities for Toshiba Group

## Identifying Key Issues

CSR Highlight 2014

In order to achieve creative growth based on the management policy and to realize the vision of Toshiba Group, we identify key issues (materialities) for Toshiba Group from the perspectives of businesses and CSR management.

### Materialities in the CSR Management of Toshiba Group

Identifying high-priority themes (materialities) common to all group companies in terms of risks and opportunities from a global perspective linked to management strategies

# Materialities in the CSR Management of Toshiba Group

### The following themes were identified as materialities (high-priority themes) for FY2013: respect for human rights, promotion of CSR management in the supply chain and environmental management.

Based on a third-party activity review conducted with reference to ISO 26000 core subjects, we analyzed the impact of Toshiba Group's businesses on society and on Toshiba Group's business operations in order to identify high-priority themes.

Impact on Toshiba Group

Initiatives developed by Toshiba Group

### **Highlight Information**

## **Process of Materiality Identification**

### Conducting a third-party activity review with reference to ISO 26000 core subjects

In FY2013, in addition to a self-evaluation based on ISO 26000, we also took into consideration a third-party activity review to identify high-priority themes from an objective perspective and deepened the common understanding of ISO 26000 among Toshiba Group members.

### Management Based on ISO 26000

| Self-evaluation based on the ISO 26000 core subjects  |

Process 2

## CSR activity review by a third-party organization

Based on the results of self-evaluation performed with reference to ISO 26000 core subjects, a third-party organization conducted a CSR activity review targeting 12 related corporate divisions through interviews and evidence check. At the end of the review, we received a review report prepared by the third-party organization from an objective perspective.

Review result report from a third-party organization

Process 3

### Identification of materialities (key issues)

By using the 345 items of ISO 26000 core subjects and by taking into consideration the activity review by the third-party organization in addition to stakeholders' opinions, we listed themes (figure on the right) in the general order of high, medium and low priority based on the levels of impact on stakeholders' decision making and on Toshiba Group' s business activities.

As a result, we identified the following three themes as materialities (high-priority themes) for FY2013: respect for human rights, CSR management in the supply chain and environmental management.

Process **4** 

## Incorporating the themes into CSR management

The identified materialities were discussed at the CSR Roundtable held once every half year by CSR officers and corporate division managers and were incorporated into the CSR management cycle by setting KPIs after being approved by the roundtable members.

AA1000AP is a series of principles, criteria, and standards issued by AccountAbility, a British NPO, to he vis-à-vis stakeholders and improve their performance.

## **Respect for Human Rights**

We make it our management principles to respect human rights and we put an emphasis on human rights in promoting our business activities.

We signed the United Nations Global Compact in January 2004 to support universal principles regarding human rights and labor practices, including the Universal Declaration of Human Rights.

### **Human Rights Policy**

The "Toshiba Group Standards of Conduct" provide a basis for acting with respect for basic human rights and individual diversity. In addition, as part of our procurement policy, we request our suppliers to also consider human rights.

### Identifying human rights risks

We have assessed human rights risks related to our business activities based on ISO 26000. In FY2013, we performed an assessment of human rights risks based on the United Nations Guiding Principles on Business and Human Rights in cooperation with Business for Social Responsibility (BSR), a US-based CSR promotion organization.

### Employee training in respect for human rights

In addition to implementing the Standards of Conduct, we periodically hold training and lecture sessions on human rights for employees at the time of their employment or promotion. In FY2013, we organized a workshop for human resource manager in Asia.

### Grievance mechanism

We provide grievance mechanism for our employees and suppliers to remedy problems.

### Action on conflict minerals issues

In FY2011 we published the "Toshiba Group Conflict Mineral Policy" and established a conflict minerals-related internal framework. In addition, we participate in the "Public-Private Alliance for Responsible Minerals Trade," a multi-sector initiative advocated by the U.S. government to support supply chain solutions to conflict minerals challenges in the Democratic Republic of Congo (DRC) and surrounding countries. In FY2013 we surveyed approximately 2,800 companies to investigate smelters and use of conflict minerals by our suppliers.

### **Annual Topics**

### Human Rights Workshop for Human Resources Managers in Asia

■ 45 managers from 9 countries participate in the workshop organized by a US CSR promotion organization In February 2014, Toshiba Group hosted a human rights workshop for human resources managers in Asia to discuss business and human rights.

As many as 45 Toshiba Group managers from 9 countries (India, Indonesia, Japan, Malaysia, the Philippines, Singapore, South Korea, Thailand and Vietnam) participated in the workshop. We invited Jeremy Prepscius and Jaewon Kim from Business for Social Responsibility (BSR), a US CSR promotion organization, to hold two-hour workshop.

Lecture on human rights

Group discussion

### Sharing the understanding of human rights and the recognition of problems

At the workshop, the lecturers explained the history and background of the United Nations Guiding Principles on Business and Human Rights. Then, group discussions were held by country to select, from among the 30 subjects in the Universal Declaration of Human Rights, themes that involve high risks or are likely to occur in each country and company, and to make presentations on the selected themes in order to share the importance of human rights initiatives.

Many participants stated that they were able to recognize how their work is related to human rights and to deepen their understanding of human rights through the workshop.

Presentation

## **Promoting Supply Chain CSR**

We will continue to fulfill our responsibilities to the wider society by constructing healthy partnerships with our suppliers and requiring and supporting the promotion of CSR.

In order that our customers can enjoy our products with comfort, and to ensure observance of CSR in such areas as the environment, labor and human rights, Toshiba Group promotes CSR initiatives throughout its supply chain. Our efforts include optimization of the working environment for our suppliers' employees and reducing environmental impact.

### **Toshiba Group Procurement Policy**

#### Toshiba Group Procurement Policy

The "Toshiba Group Procurement Policy" summarizes our requirements relating to CSR and Toshiba Group procurement, and through this we require that our suppliers give consideration to human rights, labor, health and safety, and the environment, including green procurement. In FY2012, we added a request not to use conflict minerals to the policy and distributed it across approximately 10,000 suppliers.

### Membership in the EICC

In June 2011 we joined the Electronic Industry Citizenship Coalition (EICC), an organization that promotes CSR in the electronics industry. We promote CSR in our supply chain in line with the EICC Code of Conduct.

#### Partnerships with suppliers

We are striving to build healthy partnerships with our suppliers through fair trade that complies with laws and regulations on procurement. In FY2013, we held a briefing on the Toshiba Group policy on conflict minerals in May and also a briefing to explain Toshiba Group' s management and procurement policies to executives of our 90 major suppliers in July.

#### Monitoring

In order to strengthen our suppliers' CSR management, we hold briefings and monitor the implementation of CSR initiatives. In FY2013, we conducted a survey targeting some 5,600 companies and requested them to perform self-checks. In cases where issues were found, we provided support and guidance on how to make improvements.

#### **Fair trading practices**

Toshiba Group provides Clean Partner Line, a system that allows suppliers to report compliance violations. In the event of a report, we promptly conduct a survey to confirm facts and take appropriate measures.

### Supplier CSR Survey Approximately **5,600** companies (FY2013)

### **Annual Topics**

### Participating in the Supplier CSR Promotion Program of the Department of Labor and Employment in the Philippines

Supporting the enhancement of labor conditions at suppliers Toshiba Information Equipment (Philippines), Inc. (TIP) is promoting the KAPATIRAN supplier partnership program, which was introduced in 2011 by the Philippine Department of Labor and Employment. This program aims to create a system in which large companies ("Big Brothers") guide and help small and medium enterprises ("Small Brothers") to be compliant with general labor standards including occupational safety and health standards. TIP was the country's first electronic company that participated in the program. Based on the program, TIP selects 10 companies from among its suppliers each year and educates and supports these companies for a period of one year. When the program is over, TIP submits a report to the Department of Labor and Employment. In addition to on-site training, TIP also invites external instructors for a variety of training programs.

Through this program, TIP support its suppliers in promoting CSR management and also establishes strong partnerships with them.

## **Environmental Management**

Aiming to establish ourselves as one of the world's foremost eco-companies

In October 2011 the global population exceeded 7 billion people. Rapid population growth and urbanization are forecast for the emerging market of Asia and Africa. Alongside this, we need to deal with associated issues; issues on a global scale that are interconnected and impact on one another in a complex way, such as climate change, the depletion of minerals, metals, fossil fuels and other resources that support today's society, as well as energy, water and food shortages. Toshiba has been integrating business management and environmental management, and aims to establish ourselves as one of the world's foremost eco-companies.

### We are now implementing our Fifth Environmental Action Plan and promoting environmental management with the four "Greens" concepts.

Toshiba Group has developed "Environmental Vision 2050" as the corporate vision under which we aim to realize a world in which people can enjoy affluent lifestyles in harmony with the Earth by the year 2050. The vision require the Group to increase the degree of improvement in overall eco-efficiency by ten times (Factor 10) by 2050 against the 2000 level. Toward that goal, we are now following Fifth Environmental Action Plan, which we initiated in FY2012, under which we promote four "Green" concepts- "Greening of Process" (environmentally conscious manufacturing), "Green of Product" (creation of Environmental Management products with the highest level of environmental performance), "Green by Technology" (low-carbon energy technologies), and "Green Management" (continuous improvement of basic activities). In this Action Plan, we are further integrating business management and environmental management in all business areas, and have set specific goals to ensure continuous business growth and reduce environmental impacts.

#### Implemental various measures based on the 4 "Green" concepts

#### Green of Product

Creation of products with the highest level of environmental performance

Achieving the highest level of environmental performance in all newly developed products to reduce lifecycle environmental impacts.

> Increase sales of Excellent ECPs to **¥1.8** trillion in 2015

#### **Green of Process**

Pursuing the world's lowest level of environmental impacts

Minimizing increases in environmental impact in production processes with high efficiency manufacturing

Increase eco-efficiency by 1.5 times against the 2000 level by 2015 (FY2015) Green by Technology Deploying advanced low-carbon technologies on a global scale

Contributing to provision of a stable power supply and mitigation of climate change through low-carbon energy technologies

Increase sales of energy-related products to ¥1.9 trillion in 2015

### Green Management

Continually improving basic activities, such as human resource development, environmental communication and conservation of biodiversity Train 2,000 Toshiba eco-style leaders by 2015

Aiming to establish ourselves as one of the world's foremost eco- companies

(FY)

- No.1 share\*1 in the global market in terms of total generating capacity
- Realizing high performance and high reliability with moisture removal technology, coating technology, axial exhaust turbines, etc.

#### Elevator for Chinese market New ELECOSMO-E

- Industry-leading\*2 levels of energy saving in elevators for social housing
- Reduces stand-by energy by adopting a new control system and turning off fans and lightings automatically

\*1: As of June, 2013. Capacity based power generation total delivery record, based on Toshiba in-house research. \*2: At the time of product release; not intended to guarantee the current position.

#### Green of Process

Total greenhouse gas emissions

## 2.76<sup>\*</sup> million tonnes CO<sub>2</sub>

By actively promoting energy-saving diagnostics and investment, the level of emissions was lower than the planned level of 3.92 million tonnes CO<sub>2</sub>, and has been reduced to less than half the FY1990 level.

\* The CO2 emission factor used in FY2013 is the FY2012 value (4.87 tonnes CO2 per 10,000 kWh)

### Green Management

Toshiba Group Global Environmental Action

## Participation from 363 sites

For the first time on June 5, 2013, 363 business and production sites promoted and participated in the energy conservation-themed, simultaneous lights-down activity, to reduce lighting at business sites and the homes of employees. Lights-down at the HQ building (before and after)

### We are committed to continue to enhance environmental management and have introduced T-COMPASS, a new environmental management concept.

At Toshiba Group we develop and apply our own measures to achieve reductions in environmental impacts. For example, in FY1993 we introduced LCA, a method for lifecycle environmental impact assessment, and in FY2003 we introduced "factor," as a measure of improvement in eco-efficiency. In FY2013 we introduced a new environmental management concept called T-Compass, in order to strategically capture new global trends, such as widening the scope and coverage of the environmental aspects of business.

As the environmental compass for Toshiba, T-Compass represents all environmental issues that need addressing with the North, South, East and West symbols of the compass. While there has been no change to our prior approach of reducing our overall environmental impacts, by specifically identifying environmental contributions in four main areas we believe that Toshiba Group will be able to better share the value we are providing with both internal and external shareholders. While taking on board leading-edge discussions, we aim to make the environmental information that we disclose easier to understand.

### Toshiba Group's Environmental Compass: "T-COMPASS"

2014

Leading Innovation >>>

#### **CSR Highlight** CSR Supported by 200,000 Employees

Toshiba Group's CSR is supported by the activities of each and every one of 200,000 Toshiba Group employees. We will continue to act as a corporate group that maintains a high level of motivation among its employees to further enhance CSR initiatives and increase corporate value.

### **Promoting Diversity Exhibiting diverse individuality and expertise**

Getting the best out of our employees' strengths and their diverse individuality creates innovation and leads to the growth of the company. On the basis of this philosophy, Toshiba Group has long positioned diversity as a "management philosophy," and from top management down, we are committed to diversity, both internally and externally. In FY2013 we identified "training and utilization of diverse human resources" as a management policy, and in addition to initiatives in HR planning and HR development we are also accelerate activities to promote diversity. We have set targets for raising the ratio of female executive officers to above 5.0% in FY2015. In FY2012, 11 women held senior positions (nine at the general manager class, two chief technology auditor), and we propose to triple that number. in FY2015.

Trends in the Number and Ratio of Female Workers (Toshiba Corp., Manager and Above)

### **Development of Corporate Culture** Highest priority on human life, safety and compliance

Toshiba Group lists "Commitment to People" as one of its management philosophy and conducts business activities while placing the highest priority on human life, safety and compliance.

In order to ensure the safety of our employees we have acquired third-party certification to International Occupational Health and Safety Management System OHSAS 18001 standard since FY2007. Based on the system, we continue to reduce health and safety risks through risk assessments and maintain and manage compliance with laws and regulations.

In addition, in order to implement strict compliance, we have produced and distributed the "Toshiba Group Standards of Conduct" in 16 languages, and provide training. Various compliance programs, training including the "Toshiba Group Standards of Conduct," are incorporated into level-based training, occupation-based training and senior management seminars. On top of this, all employees undergo repeated training via e-learning. In FY2013 our e-learning themes included bribery, fraudulent transactions and improper expenses, and we continue to work to ensure Group compliance with laws and regulations.

**Consolidated Companies that Have** Attained OHSAS 18001, by Region

Note: As of the end of March 2014

### Social Contributions of Toshiba Group's 200,000 Employees The combined power of individuals and organizations

### "Toshiba 'ASHITA' Award"

Seeking to stimulate activities that contribute to society, we initiated the "Toshiba 'ASHITA' Award" in FY2005, to recognize social contribution activities. Every year, we invite individuals and companies throughout Toshiba Group to submit their social contribution activities. In FY2013, the 9th year of the event, we received 1,616 entries from a total of approximately 127,000 participants. To complement the current "Corporate Citizenship Award" category, we have established a new category "Social Contributions by Business" to promote contributions to social issues. Based on recommendations from business departments, we selected programs by reflecting the opinions of evaluators from NGOs and other external organizations. We are actively working to promote the involvement of all 200,000 employees in these activities.

### Supporting rural communities with donations of lighting and solar panels

Colleen Smith serves as a director of "Power 2 The People" (P2TP), an NGO that promotes the spread of solar power generation in developing countries. Since coming into contact with this NGO in 2009 she has participated in individual P2TP activities, and has travelled to Nicaragua on four occasions at her own expense to install solar power generating equipment, etc.

#### **FY2013 Toshiba "ASHITA" Award Winners** Social Contributions by Business

### Supporting intellectually disabled people in finding work and becoming self-reliant

Toshiba With was established in February 2005 as a special subsidiary company. Employees with intellectual disabilities are put to work throughout Toshiba Group on tasks such as printing, cleaning, mail duties and healthcare, and through this we hope that they can experience the responsibility, reward and joy of working, learn self-reliance and at the same time learn how to cope with society. We are working closely with support organizations and the families of people with disabilities to build an integral support system.

### Continuing support activities for reconstruction after the Great East Japan Earthquake

With employee-organized fundraising and labor union activities taking the lead, we continue to dispatch volunteers to the affected areas. In addition, specialty goods from the affected areas are on sale at shops in Toshiba HQ and our factories, and local foods are used in the canteen menu. Since FY2012, as part of their initial training, new employees of Toshiba and other Group companies assist the shipping of seaweed from the affected region."

Toshiba With Corporation

New employees providing reconstruction support activities (April, 2014)

#### Toshiba Group's mid- to long-term commitment to support recovery from the Great East Japan Earthquake

We continue to support the reconstruction of the Tohoku region from the perspectives of human development, manufacturing (industrial development), and community development, toward helping the affected region and the people affected by the disaster recover as soon as possible. In addition, we continue to cooperate and support the stable maintenance and decommissioning of the Fukushima Daiichi Nuclear Power Station.

Human development Developing human resources for the nexgeneration

- Scholarships for college students in the Tohoku region
- Cooperation with NPO, ETIC (Entrepreneurial Training for Innovative Communities)
- New employee reconstruction support activities
- Employees' volunteer activities'

- Nippon Paper Industries Co., Ltd.: procurement of copier paper from Ishinomaki Mill
- Purchases of sports support goods
- Providing foods from the quake-hit region in staff canteens (including suppliers)"

Community development Providing safe, secure and

- Developing the smart community business (litate, lshinomaki and Kuji, etc.)
- Fukushima Airport mega solar project
- Minamisoma Solar Agri-Park Project" egion

Toshiba Group CSR Report 2014 39

### CSR Performance

### Major Achievements and Targets & Plans (KPI)

In our CSR activities, Toshiba Group establishes medium-term key performance indicators (KPIs) according to the ISO 26000 core subjects. In FY2013, we placed particular emphasis on select KPIs and set quantitative targets.

### Organizational Governance

|  | FY2012   | FY2013  | FY2013  | FY2014  |
|--|--|---|---|---|

# CSR Performance FY2013 Topics

## **Organizational Governance**

### > CSR Management

> A total of 280,000 employees in Japan participated in CSR workplace meetings.

- > The CSR Conference was held during CSR Month (December).
- Selected for the 14th consecutive year to be a member of the Dow Jones Sustainability World Index (DJSI World), which contains approx. 300 leading sustainability leaders worldwide.

## > Corporate Governance

> Appointment of 16 directors and reappointment of a female outside director for further expansion of the global business

## Human Rights

## > Respect for Human Rights

> Workshop on Business and Human Rights for human resources managers from nine countries in Asia

## Labor Practices

#### > Promotion of Diversity

Toshiba Group explicitly specified the active development and utilization of diverse human resources as one of its management policy.

## > Support for Diverse Work Styles

Toshiba Group held a nursing care seminar for its employees.

### > Occupational Health and Safety

- > Number of Toshiba Group companies that have acquired OHSAS 18001 certification: 101
- Frequency of work-related accidents at Toshiba and its Group companies in Japan (frequency of accidents per million work hours resulting in death or injuries that require one or more days off work): 0.20

## **The Environment**

#### > The Environment

- > 1.6 trillion yen of excellent ECPs (Environmentally Conscious Products) sold (target: 0.8 trillion yen).
- > Reduced total greenhouse gas emissions to 2.76 million tons (target: 3.92 million tons or less).
- 363 sites participated in Toshiba Group Global Environmental Action
- Introduced T-COMPASS, a new environmental management concept

## **Fair Operating Practices**

#### > Risk Management and Compliance

> Placed managers of legal affairs in major overseas regions as a measure to enhance global compliance

#### > CSR Management in the Supply Chain

Conducted a survey on the use of conflict minerals for some 2,800 Toshiba Group suppliers that could have been using "3TG" conflict minerals.

#### Customers

### > Quality Control

> Promoted initiatives to prevent product defects in upstream design processes (enhancement of capabilities to ensure product quality)

#### > Ensuring Product Safety

> Launched a Group-wide Safety No. 1 Working Group to enhance product safety initiatives

#### > Information on Product Safety

> Continued to enhance efforts to accelerate the collection of products subject to recall

#### > Customer Service and Support

> Comprehensive manner training for call centers in order to improve customer satisfaction with after-sales services in emerging countries

## > Universal Design

- Released a lightweight and user friendly cleaner
- > Universal design at the Toshiba Science Museum

## **Community Involvement and Development**

### > Support for Local Community Development

- > Development of a weather radar for forecasting the occurrence of heavy rainfall and tornadoes
- Serving seafood produced in Miyagi Prefecture at company cafeterias to support the recovery of the areas affected by the Great East Japan Earthquake
- > Toshiba Science Museum opened
- Science and Technology Competition for Children in the U.S. and Canada
- Establishing Toshiba Carrier Air Conditioning (China)
- Starting Collaborative Research with IIT Madras in India
- > Experimental program for the improvement of local life in India
- > Sending doctors and dentists to areas around a factory in the Philippines
- > Training electric locomotive maintenance engineers in South Africa

#### > Community Relations

> We actively organized facility tours and other events at many business sites to hold dialogues with local community residents.

Leading Innovation >>>

## Stakeholders

Toshiba Group's business activities involve relationships with diverse stakeholders. Here we clarify definition of each stakeholder, points of communication, and responsibilities of Toshiba group.

## Major Stakeholders

Toshiba Group has major business sites in over 30 countries worldwide. In carrying out our business operations, we respect the cultures, history, and customs of people in each region.

Toshiba Group CSR Report 2014 158

## Examples of Communications

#### **Key responsibilities**

- Supplying products in a stable manner
- Providing safe, secure products and services that offer great value
- Creating environmentally conscious products and services
- Promoting universal design
- Providing appropriate product information
- Offering excellent customer relations and support
- Managing customer information appropriately

# Major means of identifying stakeholders' views and requests

- Routine sales activities
- Call center (via phone, email, etc.)
- Monitoring system
- Customer satisfaction (CS) survey

## Communication with Customer [Point of contact: Customer Satisfaction Division]

#### Utilization of customer voices

We receive comments and requests for products and services in our daily operations, which are shared among related personnel including top management, and use them to improve product quality and repair services.

> Utilization of customer voices

Toshiba PC customer support

## Framework for Reflecting VOC in Business Activities

## Shareholders/Investors

#### **Key responsibilities**

- Disclosing information in a timely and appropriate way
- Providing an appropriate return of profits
- Maintaining and enhancing corporate value
- Responding to the needs of SRI organizations

# Major means of identifying stakeholders' views and requests

- General Meeting of Shareholders
- Meetings with investors
- Questionnaire survey
- Investor Relations (IR) website

Communication with Shareholders [Point of contact: Legal Affairs Division and Corporate Communications Office]

#### **Publication of Shareholder Newsletters**

Toshiba Group strives to communicate with individual shareholders through our shareholder newsletters and also gave lectures on our solar power business at the seminar hosted by IR support companies.

#### > Shareholder Newsletter (Japanese)

#### **Enhancement of IR Website**

We posted a video message from the President on our corporate investor relations website. Also, among of our efforts to improve the English language website, we started an English e-mail distribution service to provide registered users with e-mail notification about financial reporting.

#### > IR website

Questionnaire survey on the IR website

#### **General Meeting of Shareholders**

We held the General Meeting of Shareholders at Tokyo on June 25, 2013. The meeting was attended by 5,740 shareholders. We will continue to enhance our communication with our shareholders through such meetings.

At the site, there were exhibition corners set up to easily explain to the shareholders about various Toshiba products such as electronic devices, social infrastructure systems, digital products, home appliances and medical equipment. Also, booklets of Toshiba Group Annual Report 2013 were distributed at the meeting.

#### Communication with Investors [Point of contact: Corporate Communications Office]

#### Communication with Institutional Investors and Securities Analysts

Throughout the year, Toshiba works to promote communication with institutional investors and securities analysts by attending seminars hosted by securities firms, visiting investors in Japan and overseas and hosting interviews about Toshiba. In FY2013, in addition to annual financial and management policy briefings, we also held meetings to explain our healthcare business strategies and gave a tour of Toshiba's Yokkaichi Factory in response to investors' requests. Working in collaboration with securities firms, Toshiba's executive officers in charge explained our semiconductor and storage business strategies for investors in Japan and overseas, creating opportunities to promote their understanding of Toshiba Group's high-priority businesses.

Since FY2013, we have also visited overseas institutional investors to explain our ESG (Environment, Society and Governance) factors used to measure investments in companies and businesses, and we have heard a variety of opinions from such investors, including their thoughts on challenges and expectations.

Communication with Shareholders and Investors

#### **Key responsibilities**

- Selecting suppliers fairly and engaging in fair trading practices
- Respecting human rights in the supply chain
- Promoting environmental management in the supply chain

# Major means of identifying stakeholders' views and requests

- Routine procurement activities
- Briefing session on procurement policy
- CSR survey

#### Communication with Suppliers [Point of contact: Procurement Division]

We ask suppliers to promote CSR management through regular meetings to explain procurement policy and daily procurement operations. In FY2012, we revised our procurement policy so that the priority requirement when choosing new suppliers upon starting or continuing business relationships is to comply with laws and ordinances as well as social codes, and we made this revision fully known to each of Toshiba Group's more than 10,000 suppliers in Japan.

Explaining about the new procurement policy

#### **Key responsibilities**

- Conducting fair assessment and treatment
- Respecting human rights and diversity
- Optimizing human resources and promoting their growth
- Supporting diverse working styles
- Maintaining and enhancing skills and capabilities
- Ensuring occupational health and safety

# Major means of identifying stakeholders' views and requests

- Employee morale survey (TEAM Survey)
- Dialogues, information exchange meetings

Communication with Employees [Point of contact: Innovation Promotion Division / Human Resources and Administration Division / Diversity Development Division]

#### Visits by top to business sites

We actively provide opportunities for direct exchange of opinions between top management and employees. In FY2013 we organized 25 "Top Executive Innovation Visits," which involved top executives visiting manufacturing sites and other facilities to talk directly with employees in Japan and overseas.

Top Executive Innovation Visit

#### **Kirameki Forum**

With diversity as its main theme, since 2005, the Kirameki Forum provides the President and employees with an opportunity to communicate directly with each other.

> Kirameki Forum

## Local communities

#### Key responsibilities

- Respecting different customs and cultures
- Engaging in corporate citizenship activities in local communities
- Preventing accidents and disasters at business sites
- Supporting neighboring communities in case of a disaster

# Major means of identifying stakeholders' views and requests

- Dialogues, information exchange meetings
- Factory visits
- Employees' participation in community activities

### Communication with Local Communities [Point of contact: Each company and business site]

#### **Environmental communication**

We organize plant tours, hold meetings, and communicate information to enable a broad range of stakeholders such as communities around plants and offices, schools, customers, businesses, and students to learn about Toshiba Group's activities, and to invite them to think about the environment.

- > Environment Website
- Community Relations

#### **Key responsibilities**

- Complying with laws and regulations, and paying taxes
- Supporting government policies toward solving social issues

#### **Communication with Governments**

[Point of contact: Each company, business site, and Corporate Communications Office]

#### **Collaboration with Government and Authorities**

Throughout our worldwide operations, Toshiba Group seeks to collaborate with national and local governments as well as industry. We also offer appropriate opinions and proposals as well as make approaches as a responsible corporate citizen in order to help improve conditions and resolve issues confronting society.

#### Government and Authorities Relations

#### **Key responsibilities**

- Providing support to solve diverse global issues
- Collaborating with and helping local communities solve their social problems
- Collaborating on our priority areas of corporate citizenship

Major means of identifying stakeholders' views and requests

- Dialogue through collaboration
- Exchange of views at stakeholder dialogues

## Communication with NPOs and NGOs [Point of contact: CSR Office and Corporate Environment Management Division]

#### Support for and collaboration with NPOs and NGOs

We are making the most of our strengths to establish partnerships with NPOs and NGOs across a wide range of areas such as environmental protection, human rights, and social contribution by holding active dialogues with such organizations. We review our support for and collaboration with NPOs and NGOs based on criteria such as the degree of contribution to solving social

problems, relationships with Toshiba's priority business sectors, creativity, pioneer spirit, and relations with local communities.

> Support for and collaboration with NPOs and NGOs

#### Dialogue with environmental NGO

Reflecting feedback from environmental NGOs in promoting our environmental management by holding periodic stakeholder dialogues with them.

> Environmental Stakeholder Dialogue

#### Key responsibilities

- Mitigating climate change
- Reducing waste discharges
- Reducing release of chemicals
- Conserving biodiversity
- > Environment

Major means of identifying stakeholders' views and requests

 Dialogues and proposals via economic associations and industry associations

## **Stakeholder Dialogue in FY2013**

| Date  | February 18, 2014   |
|-------|---|
| Place | Toshiba Information Equipment (Philippines), Inc.,<br>Manila, the Philippines |
| Theme | CSR activities in general   |

Toshiba Information Equipment (Philippines), Inc. (TIP), Toshiba's hard disk drive (HHD) manufacturing base, has approximately 8,000 employees. It has been proactive in CSR activities as demonstrated by the fact that it became Asia's first electronics company to acquire SA8000 certification, in 2002.

A dialogue took place between Corazon Bunag, Vice President of TIP, and Jeremy Prepscius, Asia Director at Business for Social Responsibility (BSR) regarding CSR activities.

#### Main comments from the dialogue

**Corazon:** TIP's important stakeholders are its employees, its supply chain, its customers, its shareholders, local communities, and mediating and global stakeholders.

We identified the concerns and interests of the respective stakeholders covering three focus areas: Economic, Ecology, and Equity. As a strategy, our CSR Activities should improve the context of our competitiveness and address relevant social issues; that is to say, they must contribute to value chain activities and must seek the potential to create new business.

Our guiding principle as a company with integrity has lead us to acquire SA8000, ISO14001, OHSAS18001, and other global certifications. Social Accountability (SA) 8000 is a set of international standards for labor and human rights; and TIP became the Philippines' first electronics appliance manufacturer to acquire SA8000 certification. Maintaining this certification requires ongoing efforts and is time-consuming, but such efforts lead to having a competitive edge in business. Therefore, we are proactively working to do so.

Jeremy: I was impressed to hear that through their CSR activities in various regions of the Philippines, such as support for restoring devastated areas, donating products, and providing educational programs, TIP has many opportunities to share the same issues and concerns that local communities face, and their network of contacts is expanding. Engaging in such activities may provide many hints on opening new markets; and by working closely with the marketing and sales units, it is possible to build new business models that suit the circumstances of local communities.

**Corazon:** TIP sees that targeted economic engagement—particularly in the affected areas—as the means of achieving poverty reduction and longer term development through initiatives that provide these people with socially beneficial products and services that directly improve the quality of their lives or where they are directly involved as producer.

TIP aims to support the development of social enterprises that are driven by a strong social purpose to enable the marginalized population to integrate into the mainstream economy. TIP aims to participate in an environment for business interactions that create value. We also believe that supplier audits should lead to clarifying the fundamental causes of problems and measures for improving. Ideally, the relationship between customers and suppliers should be one that encourages both parties to grow as partners through such activities as the top managers of both parties discussing how their mutual business ought to be carried out.

Jeremy: One way of coping with problems that individual companies cannot easily resolve alone is to resolve them through industry cooperation. There are several examples of successes among the projects BSR is advancing—including the HER Project, which educates female workers in emerging economies in health care and hygiene maintenance, and the Clean Cargo Project, which helps the transport industry to reduce its CO2 emissions.

## **CSR Reporting Policy**

## 2014

## Our effort to report on the priority issues for our stakeholders and those for Toshiba Group

In editing the CSR Report, we examine and take into consideration the issues material for both our stakeholders as well as the Group, then verify the results using a Toshiba-specific index for determining materiality. Based on this, we have edited this CSR Report 2014 with the two new features described below.

- The 2014 edition reports on the process of identifying materiality (key issues) and incorporating them into CSR management.
  - > Materiality for Toshiba Group
- The 2014 edition reports on materiality (key issues)—Respect for Human Rights, Promotion of CSR Management in the Supply Chain and Environmental Management—as highlights of the year.
  - Key Issue: Respect for Human Rights
  - > Key Issue: Promoting Supply Chain CSR
  - Key Issue: Environmental Management

Starting in FY2013, we made our website the major medium for our CSR reports; we strive to provide easy-to-understand information and update the same in a timely manner, mainly by offering links to related information.

The CSR Report 2014 is available only from our website, which offers PDF files that can be downloaded by selecting the digest and sections to examine.

#### Organizations covered in this report

In principle, Toshiba Group (Toshiba Corporation and its 598 consolidated subsidiaries in Japan and overseas) are covered in this report, but individual entities are indicated in cases where information does not pertain to Toshiba Group.

Note:"Toshiba" in this report refers to Toshiba Corporation.

#### **Reporting period**

This report focuses on the results of activities in FY2013 (from April 1, 2013 to March 31, 2014), but also includes some activities continuing from the past as well as more recent ones.

The content of the CSR Report 2014 in PDF format is current as of the end of June 2014. Items added or updated on the CSR website after July 2014 will have notes to that effect.

#### Significant changes during the reporting period

- In May 2013, Toshiba Finance Corporation was removed as a consolidated subsidiary as a result of all shares of the corporation being sold to AEON Financial Service Co., Ltd.
- A new company (currently, Toshiba Transmission & Distribution Systems India Pvt. Ltd.) was founded to acquire the power distribution transformer and switch business of the Indian corporation, Vijai Electricals Ltd.; the business was acquired in December 2013.
- In January 2014, Toshiba Consumer Electronics Holdings Corporation was merged into Toshiba Corporation and dissolved.

#### Publication

Current issue: August 2014 (next issue scheduled for August 2015; previous issue: August 2013)

## Reporting Media and Disclosure Items on the Corporate Website

Toshiba Group provides our stakeholders with non-financial information in our CSR Report and financial information in our Annual Report. Recognizing our responsibility to provide detailed non-financial information, especially on environmental issues, we also publish the Environmental Report separately from the CSR Report.

We also provide the latest information on related matters in a timely manner through our corporate website.

#### Annual Report/Investor Relations (IR) Website

In the Annual Report, we primarily report on Toshiba Group's business performance as of the end of the fiscal year and on our three-year midterm management plan.

We have referred to the IIRC's International Integrated Reporting Framework, and in order to provide information essential as an integrated report, we have expanded nonfinantial information and the ESG section.

On the IR website, we aim to provide Toshiba's corporate information in a timely manner. An IR website optimized for mobile phone access is also available.

Key reporting items (IR website) IR News Management Policy Financial Data IR Library Stock and Bond Information For individual investors

### **Environmental Report/Environment Website**

On the environment website, we provide not only information on the Group's environmental activities in a timely manner, but also environmental reports on our production sites and Group companies.

In the Environmental Report, we provide a detailed description of the global environmental activities of Toshiba Group as a whole.

Key reporting items (Environment website) Topics Green of Product Green by Technology Green of Process Green Management
