

Storage Innovators Award

Toshiba Europe Storage Products Division is proud to have been named the Storage Innovator of the Year at the 2014 Storage Awards.

This year, the awards attracted more than 40,000 votes from readers of Storage Magazine (GB) who nominated Toshiba as the Innovator of the Year. The Storage Awards, sometimes known as 'the Storries', are now in their eleventh year and provide Storage Magazine readers the opportunity to vote for their favourite products, people and companies.

"We are very pleased to have been voted Storage Innovator of the Year and would like to thank the readers of Storage Magazine for this honour," said Martin Larsson, Vice President, Storage Products Division, Toshiba Electronics Europe. "This award reflects the tireless efforts of our research and development teams to create and implement game-changing storage technologies, that have led to innovations including the invention of NAND flash memory itself."
