

**M4G Group (1)**  
**Application Note**  
**Consumer Electronics Control Circuit**  
**(CEC-A)**

**Outlines**

This application note is a reference material for developing products using the Consumer Electronics Control Circuit (CEC) function of M4G group (1).

This document helps the user check operation of the product and develop its program.

Target sample program: CEC\_CH\_TO\_CH

## 1. Preface

This sample program is used to check the operation of CEC circuit function.

Structure diagram of Sample program

## 2. Reference Document

- Datasheet  
     TMPM4G group (1) datasheet Rev1.0 (Japanese edition)
- Reference manual  
     Consumer Electronics Control Circuit (CEC-A) Rev1.0 (Japanese edition)  
     Asynchronous Serial Communication Circuit (UART-C) Rev3.0 (Japanese edition)
- Application note  
     M4G Group (1) Application Note Startup (CMSIS System & Clock Configuration) Rev1.0
- Other reference document  
     TMPM4G (1) Group Peripheral Driver User Manual (Doxygen)

## 3. Function to Use

| IP  | Channel | Port          | Operation / Function mode |
|---|---------|---------------|---------------------------|
| CEC                                       | -       | PT2 (CEC0)    | -                         |
| Asynchronous Serial Communication Circuit | ch0     | PE2 (UT0RXD)  | UART mode                 |
|   |         | PE3 (UT0TXDA) |                           |

## 4. Target Device

The target devices of this application note are as follows;

|               |               |              |              |
|---------------|---------------|--------------|--------------|
| TMPM4G9F15FG  | TMPM4G9F10FG  | TMPM4G9FEFG  | TMPM4G9FDFG  |
| TMPM4G9F15XBG | TMPM4G9F10XBG | TMPM4G9FEXBG | TMPM4G9FDXBG |
| TMPM4G8F15FG  | TMPM4G8F10FG  | TMPM4G8FEFG  | TMPM4G8FDFG  |
| TMPM4G8F15XBG | TMPM4G8F10XBG | TMPM4G8FEXBG | TMPM4G8FDXBG |
|               | TMPM4G7F10FG  | TMPM4G7FEFG  | TMPM4G7FDFG  |
|               | TMPM4G6F10FG  | TMPM4G6FEFG  | TMPM4G6FDFG  |

\*This sample program operates on the evaluation board of TMPM4G9F15FG.

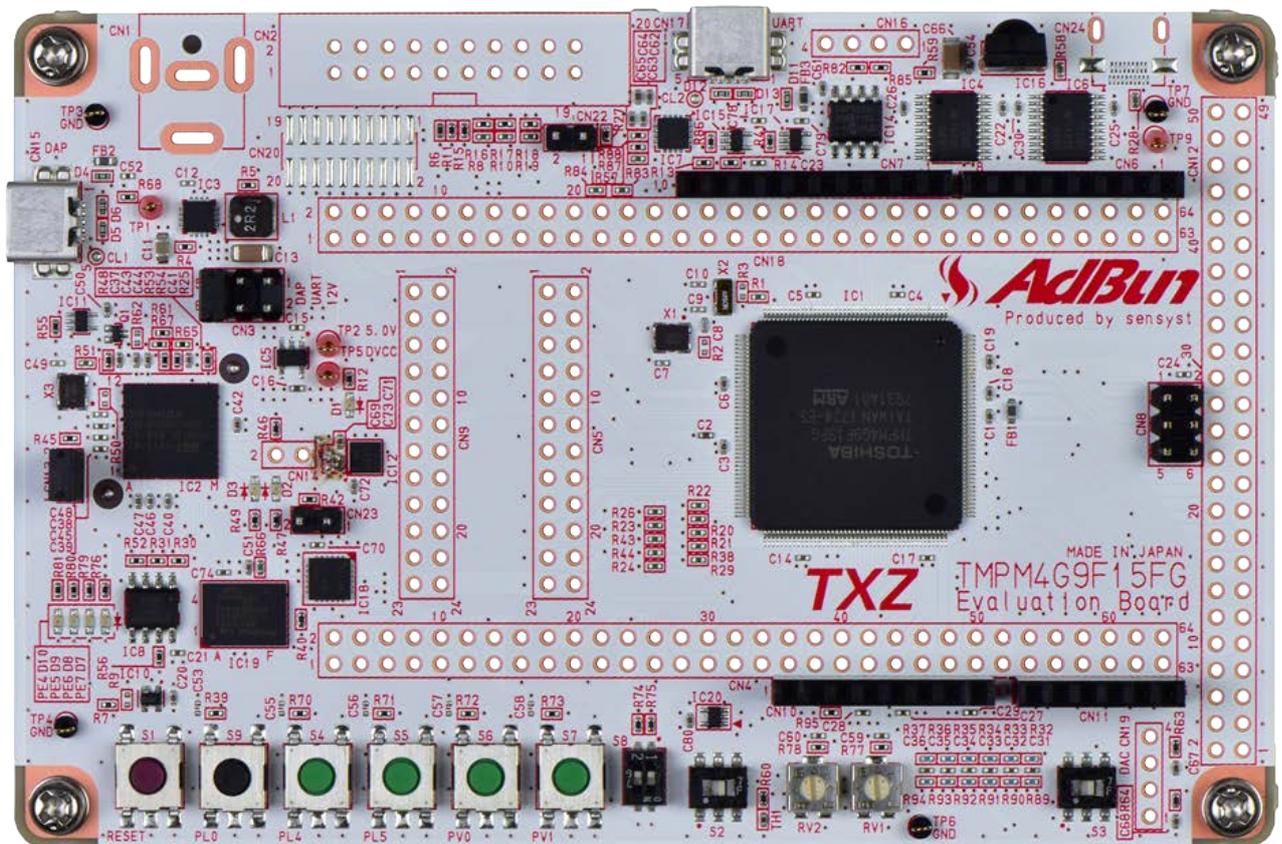

If other function than the TMPM4G9F15 one is checked, it is necessary that CMSIS Core related files (C startup file and I/O header file) should be changed properly.

The BSP related file is dedicated to the evaluation board (TMPM4G9F15). If other function than the TMPM4G9F15 one is checked, the BSP related file should be changed properly.

**5. Operation Confirmation Condition**

|                                 |   |
|---------------------------------|---|
| Used microcontroller            | TMPM4G9F15FG                                |
| Used board                      | TMPM4G9F15FG Evaluation Board by Sensyst    |
| Unified development environment | IAR Embedded Workbench for ARM 8.11.2.13606 |
| Unified development environment | µVision MDK Version 5.24.2.0                |
| Terminal software               | Tera Term V4.96                             |
| Sample program                  | V1000                                       |

Evaluation board (TMPM4G9F15FG Evaluation Board) Top view

## 6. Evaluation Board Setting

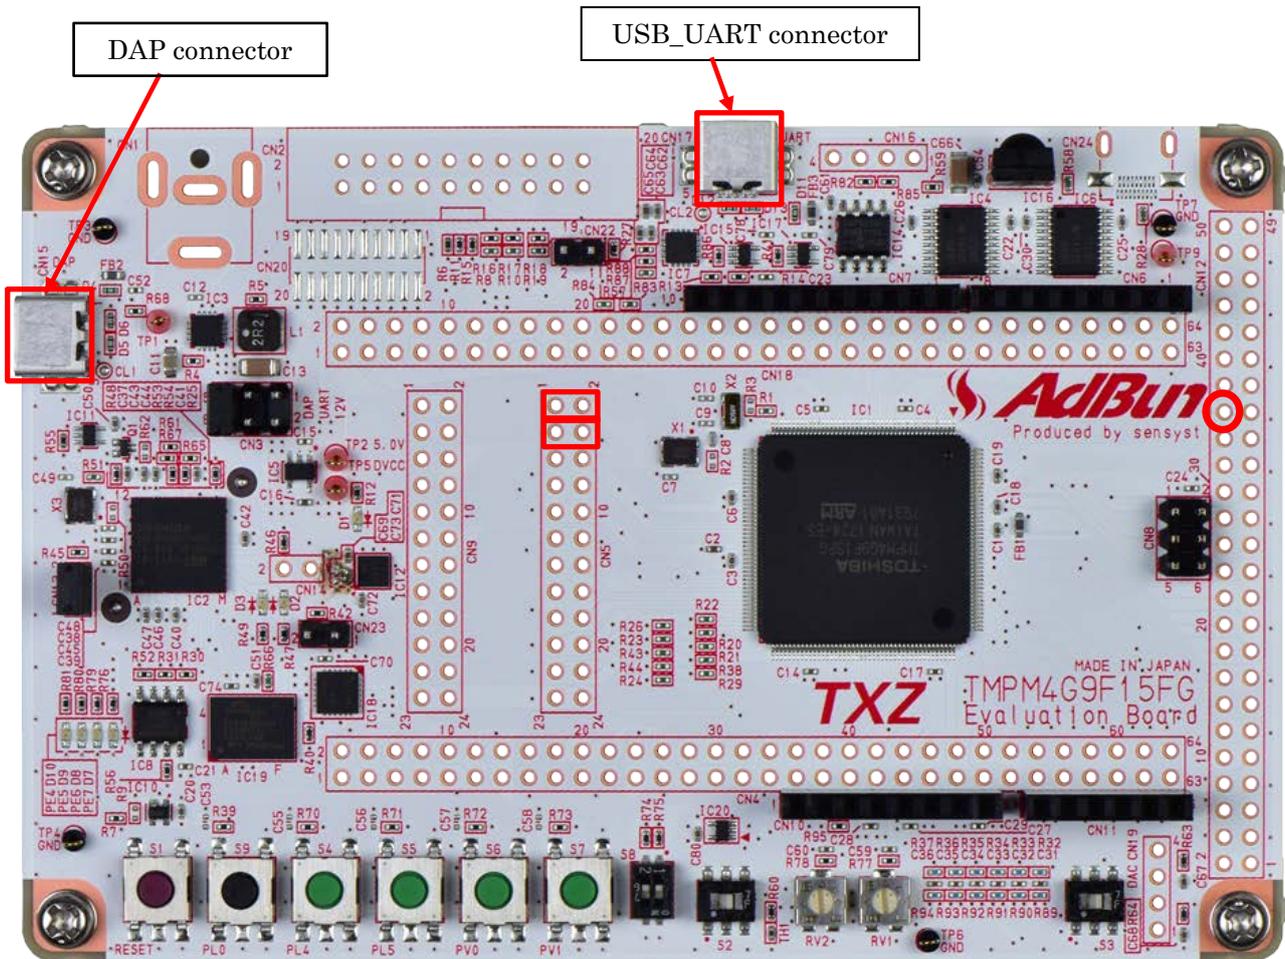

Two evaluation boards are used.  
The way of connection is the same.

The following through-holes should be connected on the evaluation board. (Common with board A and board B)

| CN5                    |                  |                  |
|------------------------|------------------|------------------|
| Board function         | Through-hole No. | Through-hole No. |
| USB to UART conversion | 1: USB_UT_RX     | 2: PE2           |
| USB to UART conversion | 3: USB_UT_TX     | 4: PE3           |

The following parts of the board A and board B are connected.

Board A: CN12 36 (PT2) - Board B: CN12 36 (PT2)

## 7. Operation of Evaluation Board

PC and the USB\_UART are connected for communication with the terminal software.  
Executes the setting of communication after the terminal software (Tera Term) starts up.  
Push down the reset button on the evaluation board.  
The communication starts with the command input.  
For details of command input operations, refer to Sample program main operation.

## 8. Outline of CEC Control Circuit Function

The brief outline of CEC Control Circuit (CEC) function is shown as follows.

| Function Classification | Function               | Operation  |
|-------------------------|------------------------|--|
| HDMI standard           | -                      | Compliant with Version 1.3a.   |
| Reception control       | Sampling clock         | Selected from the followings:<br>- fs (Low speed clock)<br>- CECxCLKTRG (Timer trigger for Clock source)   |
|                         | Noise reduction        | Noise canceling time is adjustable.<br>- "High" detection time<br>Sampling clock selected from 1 to 4 consecutive observations.<br>- "Low" detection time<br>Sampling clock selected from 1 to 4 consecutive observations. |
|                         | Data reception         | Data reception per Byte<br>- Flexible data sampling point<br>- Data reception is available even when a Destination address does not match.   |
|                         | Error detection        | - Cycle error (Max/Min)<br>- ACK collision<br>- Waveform error   |
| Transmission control    | Data transmission      | Data transmission per Byte<br>- Triggered by auto-detection of bus free state  |
|                         | Waveform adjustment    | Transmission waveform adjustment<br>- The timing of a rising edge and the cycle time are adjustable.   |
|                         | Error detection        | - Arbitration lost<br>- ACK response error   |
| Interrupt               | Transmission interrupt | - Start transmission<br>- Transmission end<br>- Arbitration lost<br>- ACK Error<br>- Underrun  |
|                         | Reception interrupt    | - Reception completed<br>- Start bit<br>- Max cycle error<br>- Min cycle error<br>- ACK collision<br>- Overrun<br>- Waveform error   |

## **9. Sample Program**

Two addresses, address 5 and address 7 are set as the CEC address.

When the header and Data are input on the Tera Term, you can check the transmission and receiving of Data by sample program.

### **9.1. Initialization**

The following initialization is done after power is supplied.

The initialization of each clock setting and the setting of the watchdog timer are done.

### **9.2. Sample Program Main Operation**

After the initialization operation, shift to the main function and do the following initialization.

- (1) Initialization of BSP (Board Support Package)
- (2) Initialization of variables
- (3) Initialization of application

The header and Data are input following "Input =".

The header and Data are displayed following "CEC Snd =", and are transmitted.

When the data are received, the header and received data are displayed following "CEC Rcv =".

### 9.3. Output Example of Sample Program

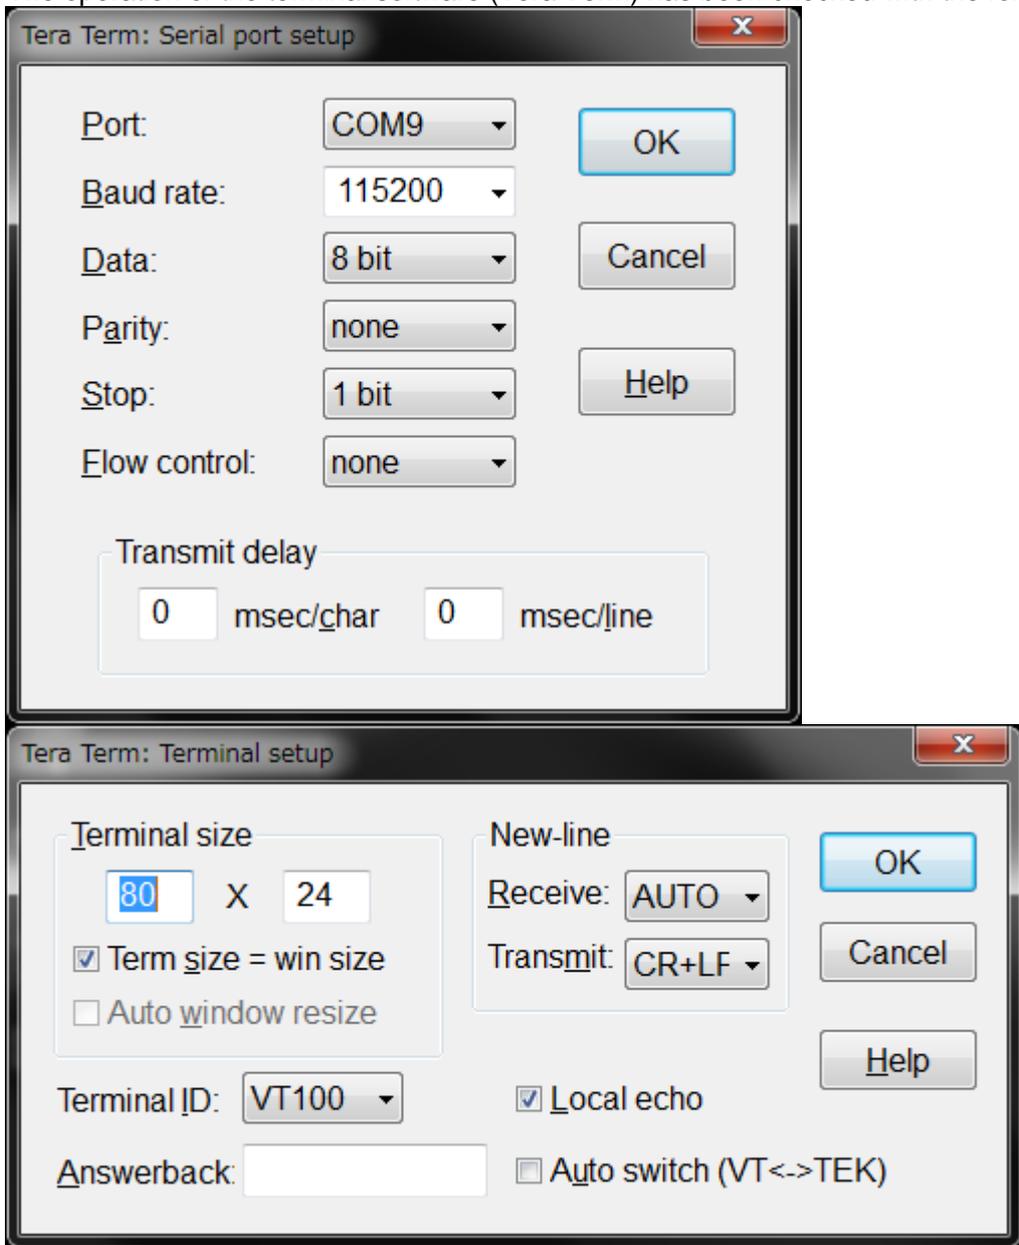

After the sample program starts to operate, the command results are displayed as shown in the following.

“u” shows header, and “abcdef” shows Data in the following example.

```
CEC Address = 5  
CEC Address = 7  
Input = uabcdef  
CEC Snd = uabcdef  
Input =  
CEC Rcv = W012345
```

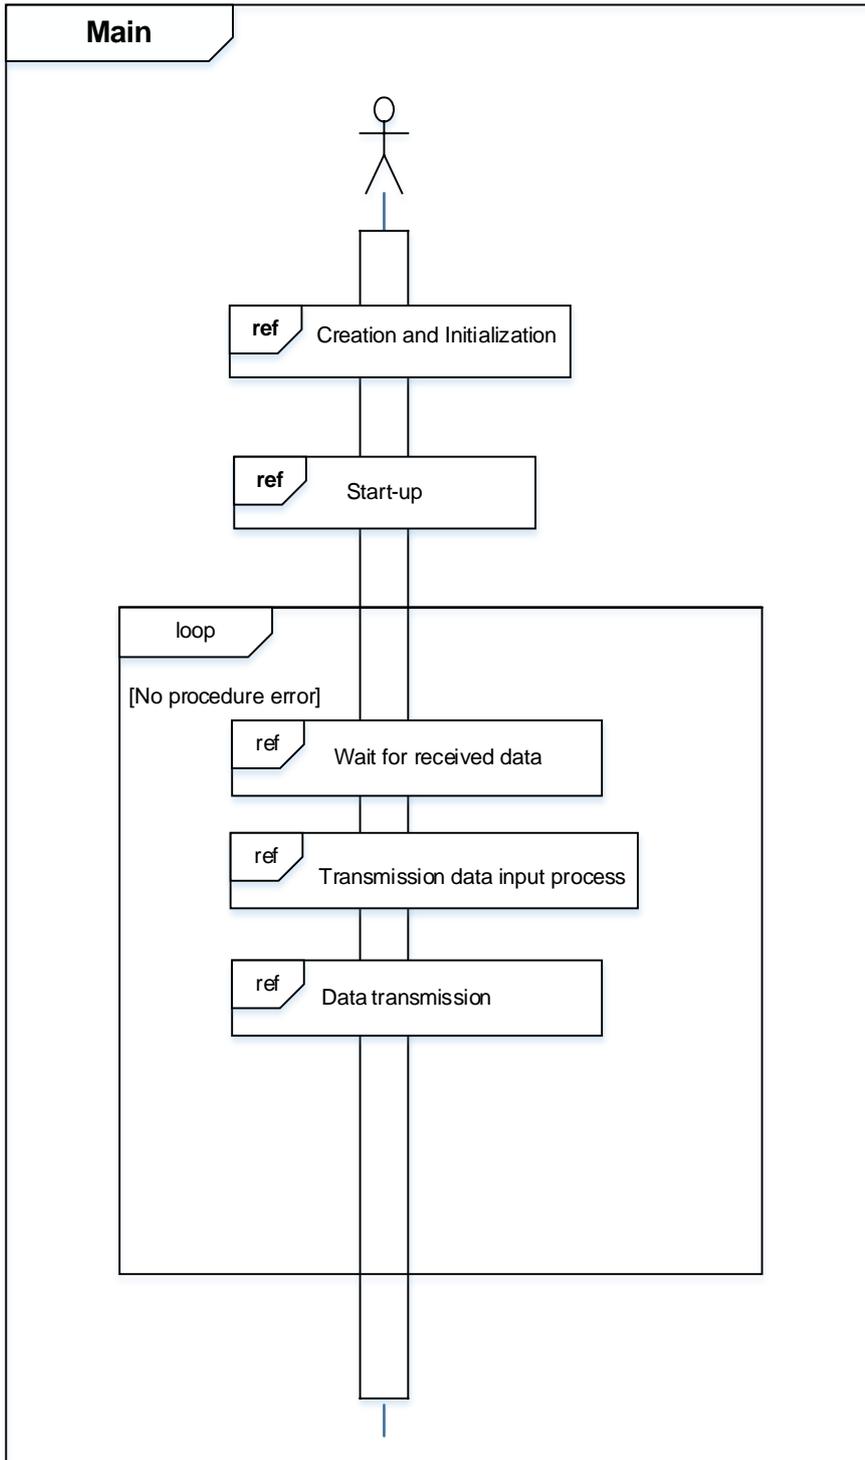

#### 9.3.1. Setting Example of Terminal Software

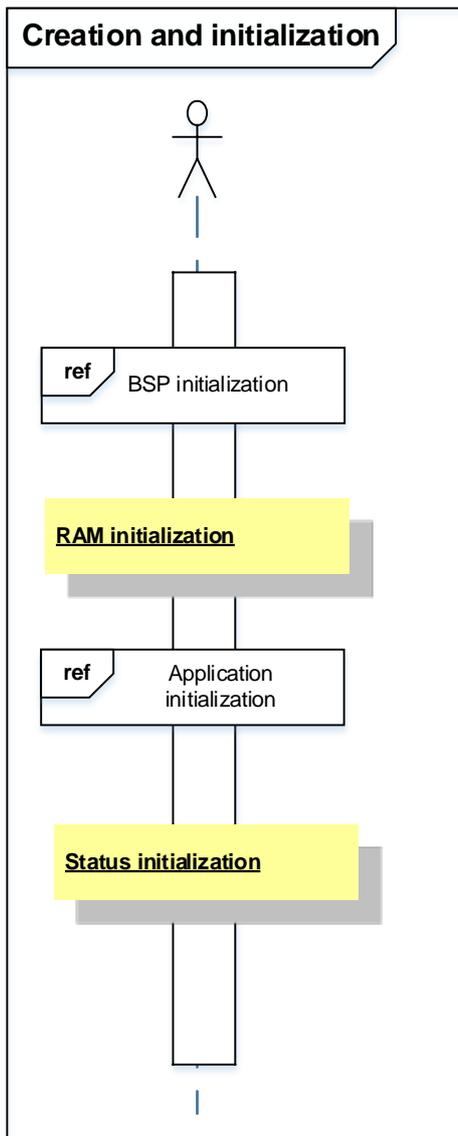

The operation of the terminal software (Tera Term) has been checked with the following settings.

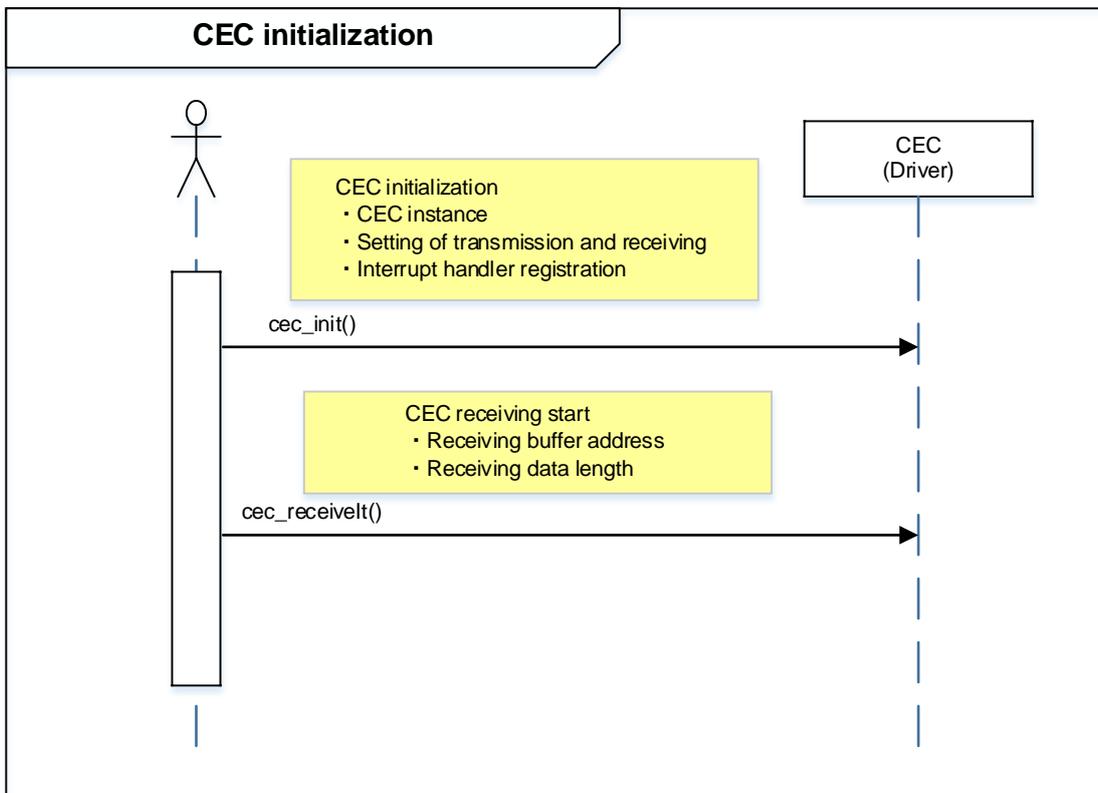

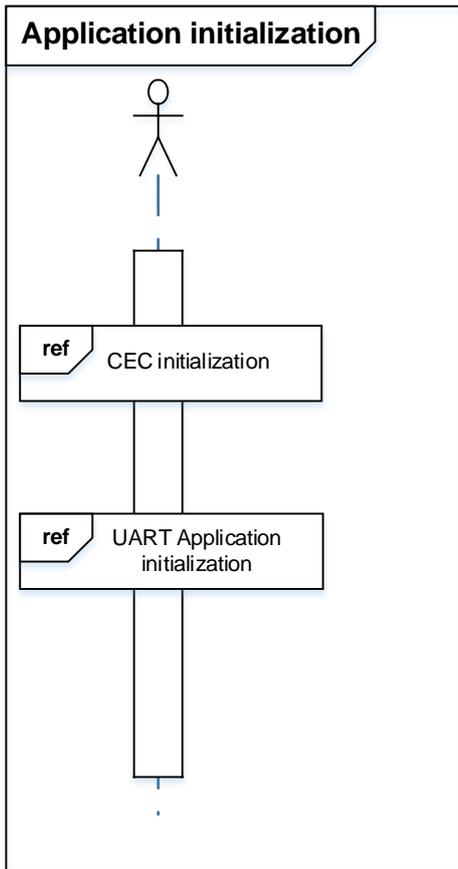

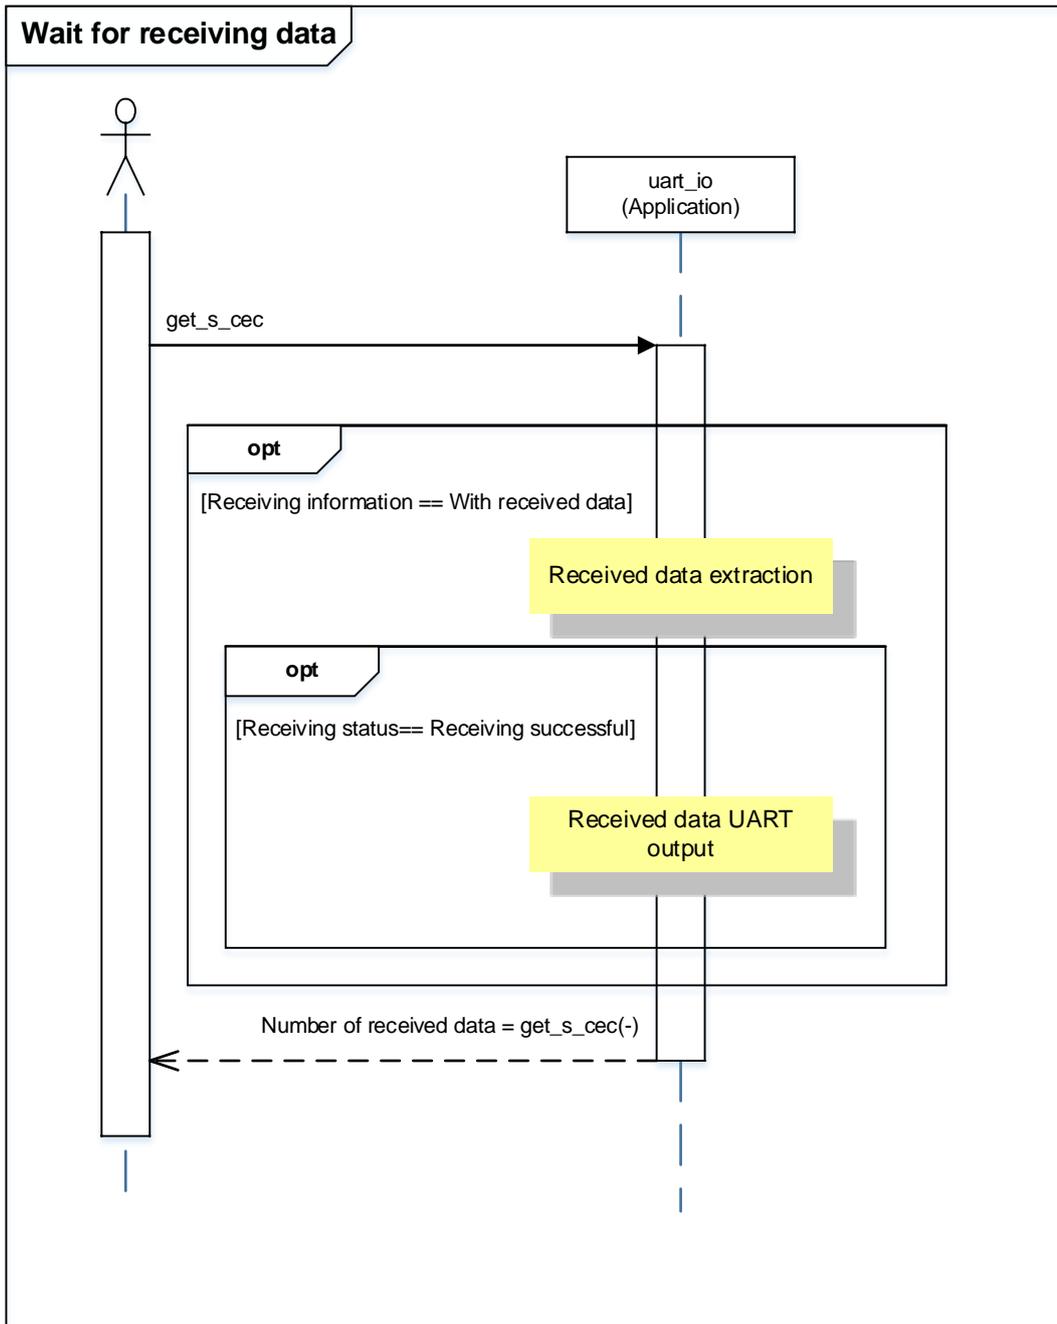

### 9.4. Operating Flow of Sample Program

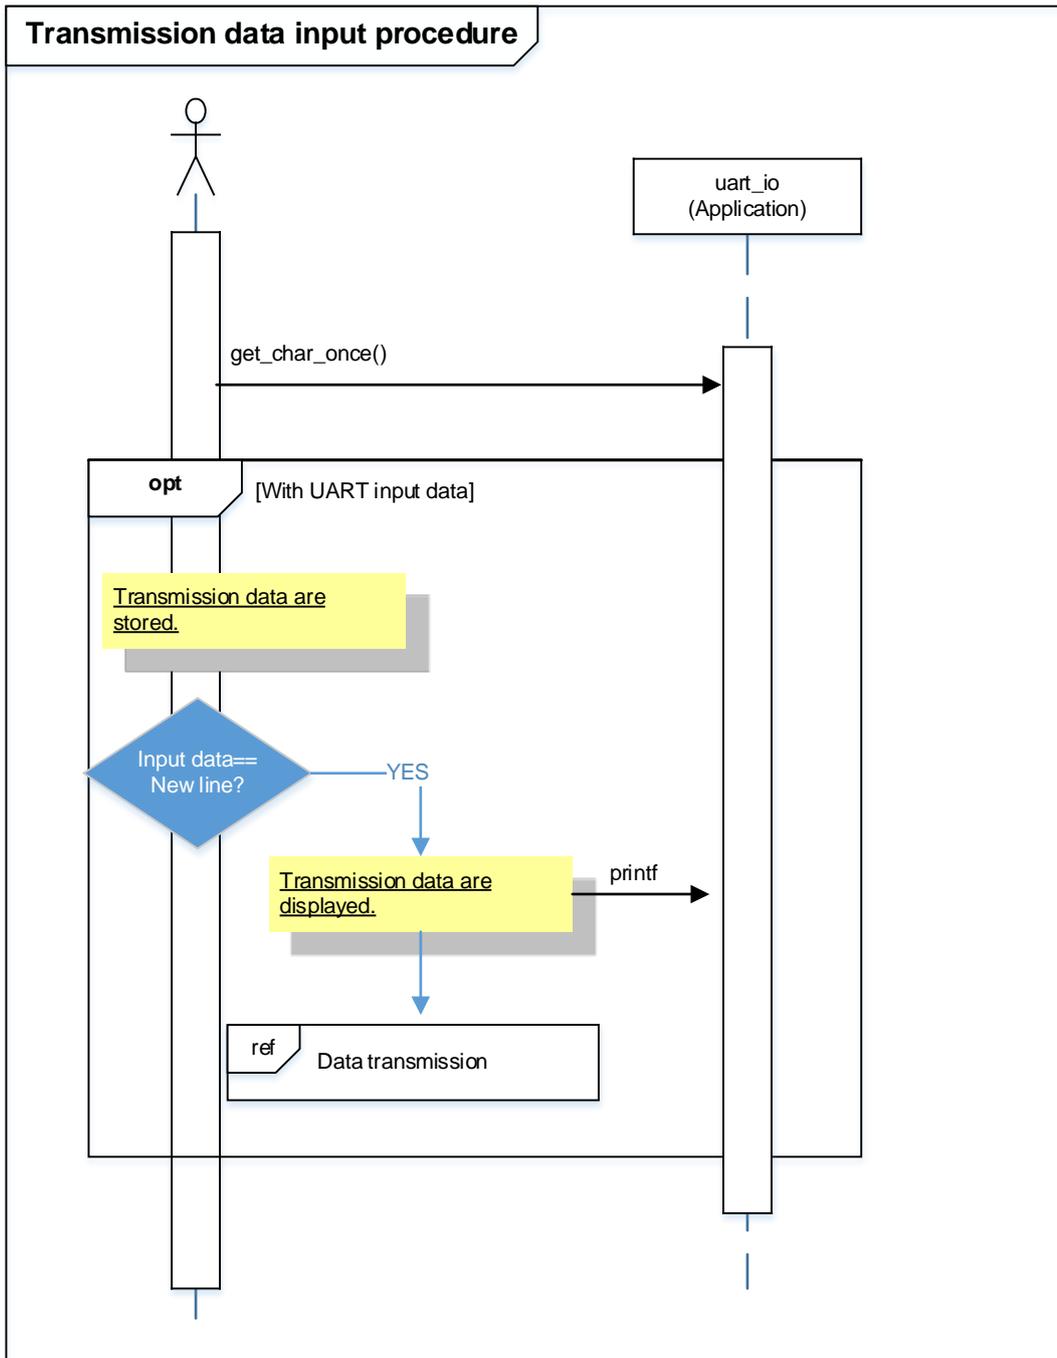

The basic operating flows of the sample program are shown in the following;

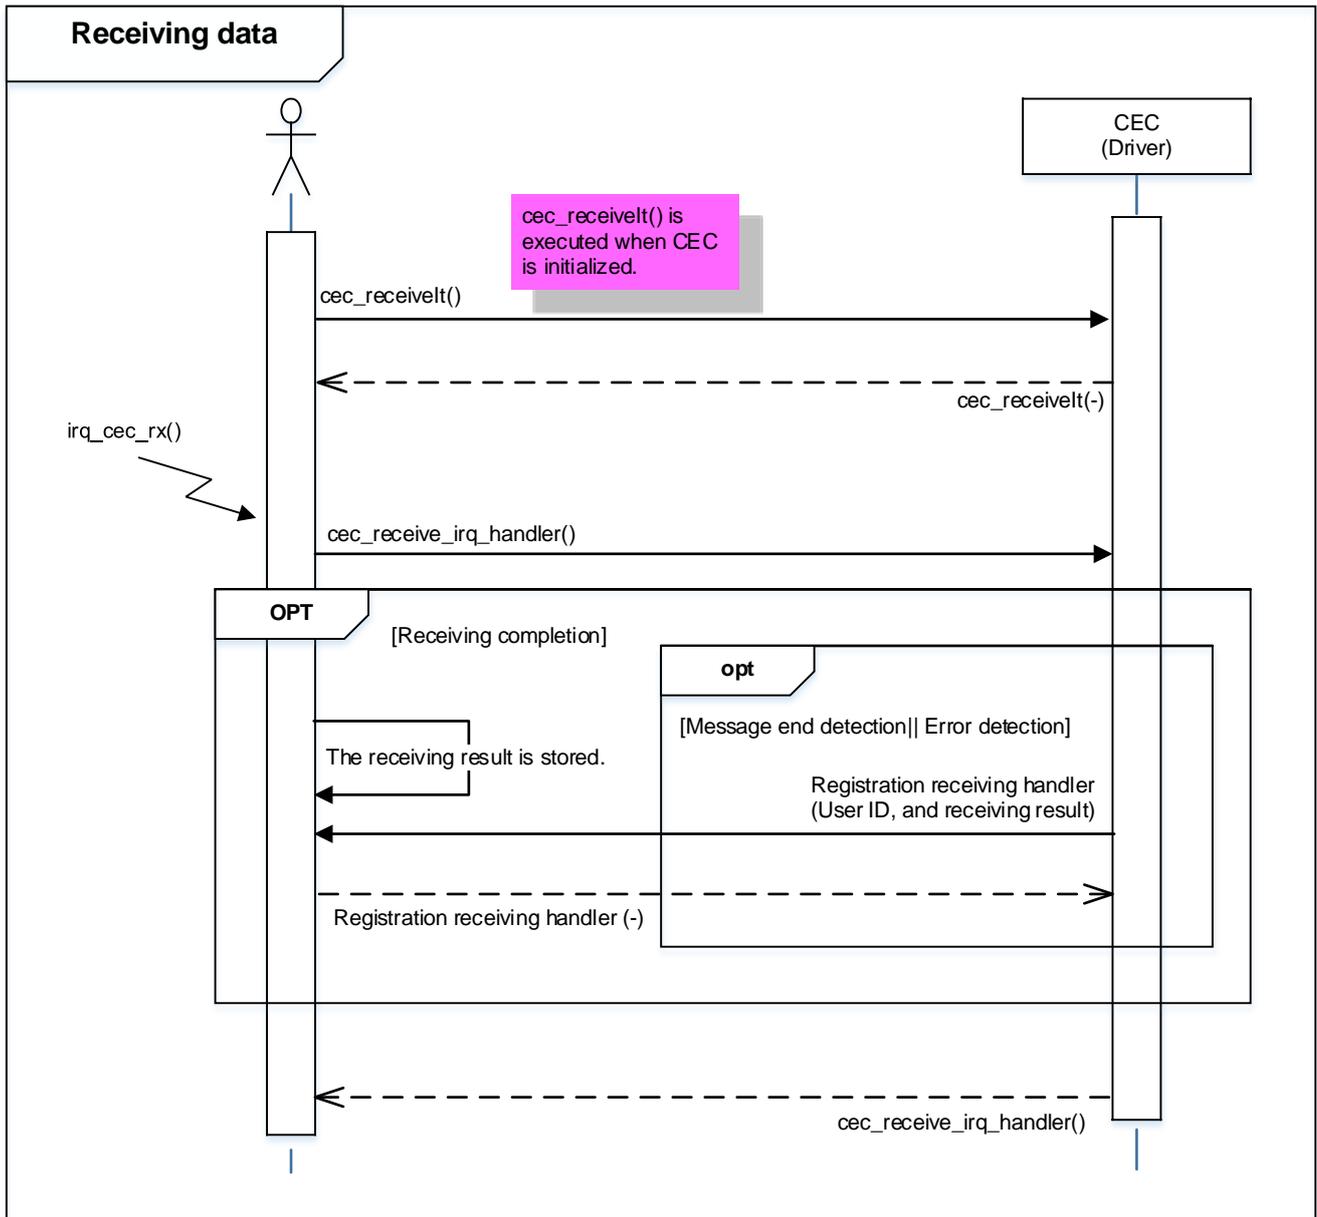

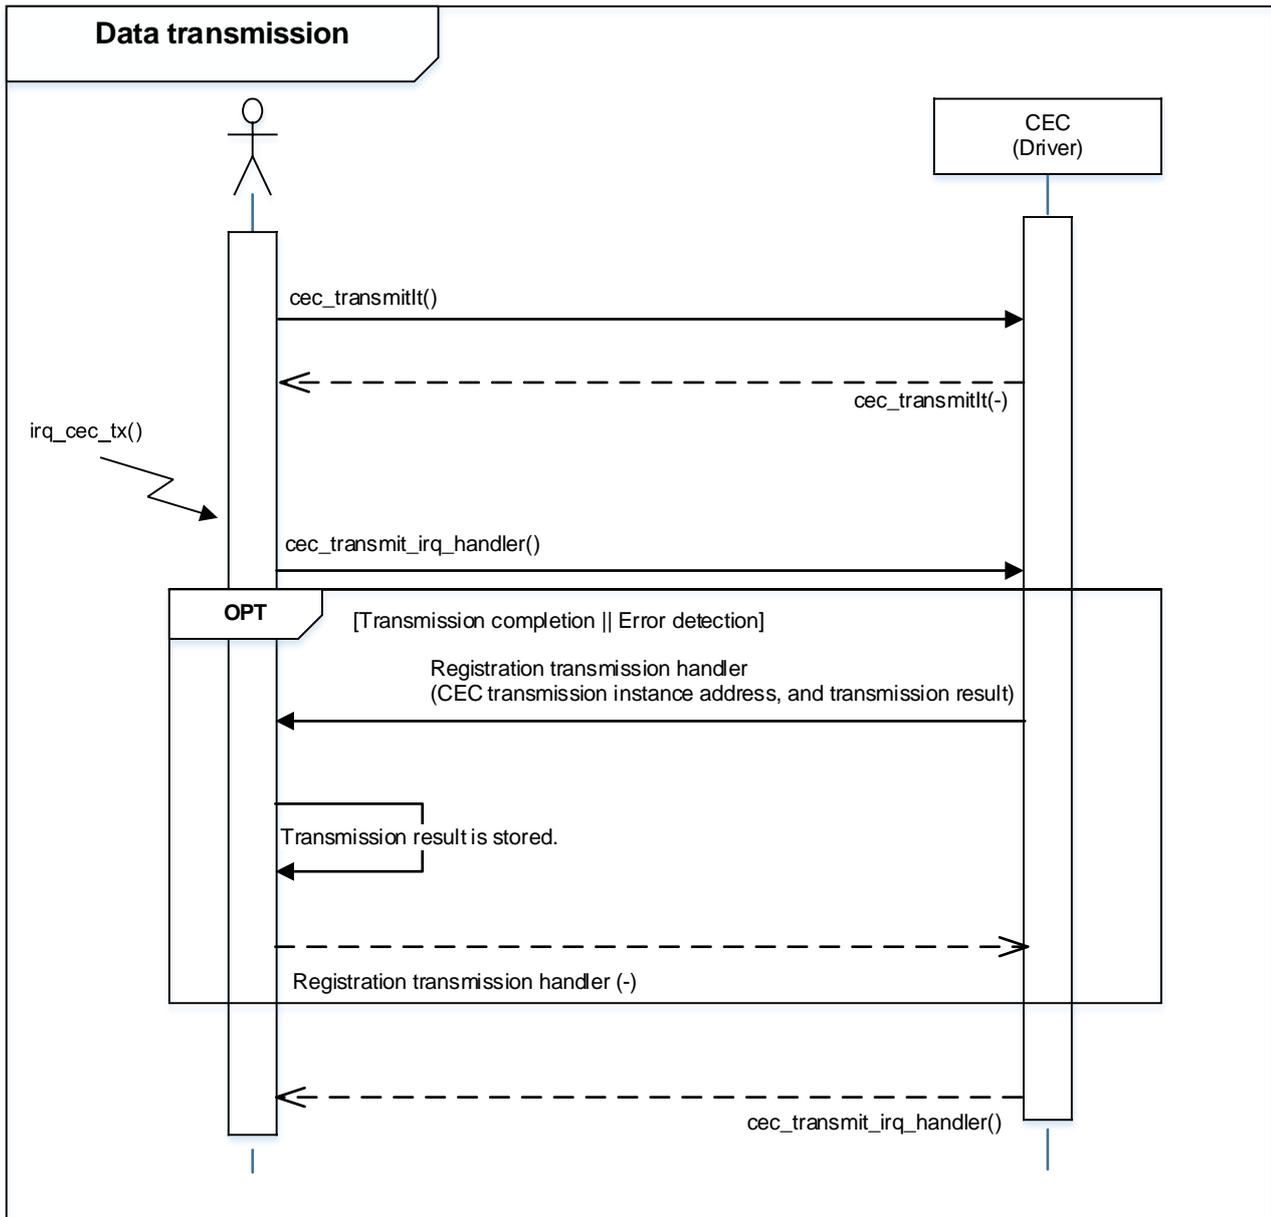

**10. Precaution**

When using the sample program with CPU other than TPM4G9F15, please check operation sufficiently.

**11. Revision History**

| Rev | Date       | Description   |
|-----|------------|---------------|
| 1.0 | 2018-11-26 | First release |

## RESTRICTIONS ON PRODUCT USE

Toshiba Corporation and its subsidiaries and affiliates are collectively referred to as "TOSHIBA". Hardware, software and systems described in this document are collectively referred to as "Product".

- TOSHIBA reserves the right to make changes to the information in this document and related Product without notice.
- This document and any information herein may not be reproduced without prior written permission from TOSHIBA. Even with TOSHIBA's written permission, reproduction is permissible only if reproduction is without alteration/omission.
- Though TOSHIBA works continually to improve Product's quality and reliability, Product can malfunction or fail. Customers are responsible for complying with safety standards and for providing adequate designs and safeguards for their hardware, software and systems which minimize risk and avoid situations in which a malfunction or failure of Product could cause loss of human life, bodily injury or damage to property, including data loss or corruption. Before customers use the Product, create designs including the Product, or incorporate the Product into their own applications, customers must also refer to and comply with (a) the latest versions of all relevant TOSHIBA information, including without limitation, this document, the specifications, the data sheets and application notes for Product and the precautions and conditions set forth in the "TOSHIBA Semiconductor Reliability Handbook" and (b) the instructions for the application with which the Product will be used with or for. Customers are solely responsible for all aspects of their own product design or applications, including but not limited to (a) determining the appropriateness of the use of this Product in such design or applications; (b) evaluating and determining the applicability of any information contained in this document, or in charts, diagrams, programs, algorithms, sample application circuits, or any other referenced documents; and (c) validating all operating parameters for such designs and applications. **TOSHIBA ASSUMES NO LIABILITY FOR CUSTOMERS' PRODUCT DESIGN OR APPLICATIONS.**
- **PRODUCT IS NEITHER INTENDED NOR WARRANTED FOR USE IN EQUIPMENTS OR SYSTEMS THAT REQUIRE EXTRAORDINARILY HIGH LEVELS OF QUALITY AND/OR RELIABILITY, AND/OR A MALFUNCTION OR FAILURE OF WHICH MAY CAUSE LOSS OF HUMAN LIFE, BODILY INJURY, SERIOUS PROPERTY DAMAGE AND/OR SERIOUS PUBLIC IMPACT ("UNINTENDED USE").** Except for specific applications as expressly stated in this document, Unintended Use includes, without limitation, equipment used in nuclear facilities, equipment used in the aerospace industry, lifesaving and/or life supporting medical equipment, equipment used for automobiles, trains, ships and other transportation, traffic signaling equipment, equipment used to control combustions or explosions, safety devices, elevators and escalators, and devices related to power plant. **IF YOU USE PRODUCT FOR UNINTENDED USE, TOSHIBA ASSUMES NO LIABILITY FOR PRODUCT.** For details, please contact your TOSHIBA sales representative or contact us via our website.
- Product shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable laws or regulations.
- The information contained herein is presented only as guidance for Product use. No responsibility is assumed by TOSHIBA for any infringement of patents or any other intellectual property rights of third parties that may result from the use of Product. No license to any intellectual property right is granted by this document, whether express or implied, by estoppel or otherwise.
- **ABSENT A WRITTEN SIGNED AGREEMENT, EXCEPT AS PROVIDED IN THE RELEVANT TERMS AND CONDITIONS OF SALE FOR PRODUCT, AND TO THE MAXIMUM EXTENT ALLOWABLE BY LAW, TOSHIBA (1) ASSUMES NO LIABILITY WHATSOEVER, INCLUDING WITHOUT LIMITATION, INDIRECT, CONSEQUENTIAL, SPECIAL, OR INCIDENTAL DAMAGES OR LOSS, INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF OPPORTUNITIES, BUSINESS INTERRUPTION AND LOSS OF DATA, AND (2) DISCLAIMS ANY AND ALL EXPRESS OR IMPLIED WARRANTIES AND CONDITIONS RELATED TO SALE, USE OF PRODUCT, OR INFORMATION, INCLUDING WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, ACCURACY OF INFORMATION, OR NONINFRINGEMENT.**
- Do not use or otherwise make available Product or related software or technology for any military purposes, including without limitation, for the design, development, use, stockpiling or manufacturing of nuclear, chemical, or biological weapons or missile technology products (mass destruction weapons). Product and related software and technology may be controlled under the applicable export laws and regulations including, without limitation, the Japanese Foreign Exchange and Foreign Trade Law and the U.S. Export Administration Regulations. Export and re-export of Product or related software or technology are strictly prohibited except in compliance with all applicable export laws and regulations.
- Please contact your TOSHIBA sales representative for details as to environmental matters such as the RoHS compatibility of Product. Please use Product in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. **TOSHIBA ASSUMES NO LIABILITY FOR DAMAGES OR LOSSES OCCURRING AS A RESULT OF NONCOMPLIANCE WITH APPLICABLE LAWS AND REGULATIONS.**
